PROFILE

Full-stack MERN developer — three internships, two live projects: a luxury e-commerce platform and an AI trip planner. I'd rather spend a day tracking down one weird bug than skip past it.

SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Redux, Tailwind CSS, Three.js, HTML5, CSS3

Backend/Database: Node.js, Express.js, MongoDB, REST APIs

AI/LLMs: Gemini AI

Data/BI: Tableau, Power BI, Excel

Auth/Deploy: JWT, Google OAuth, Vercel, Render

Tools: Git/GitHub, Razorpay, Stripe, Cloudinary

CERTIFICATIONS

- [NPTEL Elite+Silver — Cloud Computing, IIT Kharagpur](#) — 2025
- [NPTEL Elite+Silver — Industry 4.0 & Industrial IoT, IIT Kharagpur](#) — 2024
- NASSCOM Gold — Big Data

EXPERIENCE

MoovOn Services & Solutions

Bhubaneswar, India

MERN Stack Intern

Oct 2025 – Mar 2026

- Built REST APIs with full CRUD support for core application features across the MERN stack.
- Built responsive React interfaces, keeping the UI consistent across devices and screen sizes.
- Split time between frontend and backend work — building React components one sprint, adjusting the database schema the next.

Technoboot Pvt. Ltd.

Bhubaneswar, India

MERN Stack Intern

June 2024 – July 2024

- Built responsive UI components in React, wiring them up to REST APIs built on Express and MongoDB.
- Handled the data flow between the frontend and MongoDB through Express-based APIs — my first real exposure to connecting every layer of an app.

OCAC Training Center

Bhubaneswar, India

Java Intern

June 2023 – July 2023

- Wrote Java applications applying core OOP principles — classes, inheritance, and interfaces — in a structured training environment.
- Spent a good chunk of time debugging and testing rather than just writing new code — my first taste of a production-style workflow.

PROJECTS

Lumière — Luxury E-Commerce Platform

[Live](#) | [GitHub](#)

React, Redux Toolkit, Express.js, MongoDB, Stripe, Razorpay

- Built a luxury e-commerce platform with 360° product views and multi-gateway checkout — Stripe, Razorpay, and cash on delivery.
- Set up secure authentication with JWT, Google OAuth, and email OTP, and confirmed the OTP flow end-to-end in production.
- Built an admin dashboard with Recharts sales charts plus inventory, coupon, and CMS management.
- Audited the codebase for security gaps ahead of launch, fixing IDOR vulnerabilities and NoSQL injection risks across the API layer.

Roamly — AI Trip Planner

[Live](#) | [GitHub](#)

MERN, Gemini AI, Three.js, Leaflet

- Built an AI trip planner that turns a single prompt into a full itinerary using Gemini AI.
- Added an interactive Three.js 3D globe and Leaflet-based route mapping, animated with Framer Motion.
- Debugged a persistent sticky-navbar and overflow CSS conflict that kept breaking page transitions.
- Added live weather via Open-Meteo and one-click PDF itinerary export.

EDUCATION

GIFT Autonomous

Bhubaneswar, India

Bachelor of Technology in Computer Science and Engineering

2022 – 2026

- CGPA: 8.08/10
